At Events which combine Youth with Junior / Senior, organisers must consider the competition schedule to facilitate athletes to compete only once.

2 THE TWO LIFTS

2.1 GENERAL

In the sport of weightlifting the IWF recognises two (2) lifts which must be executed in the following sequence:

➤ IWF TECHNICAL AND COMPETITION RULES & REGULATIONS

- a) The Snatch
- b) The Clean & Jerk

Both lifts must be executed with two hands. A maximum of three (3) attempts is allowed in each lift.

2.2 THE SNATCH

- 2.2.1 The barbell is centred horizontally on the competition platform. The athlete takes the start position behind the barbell. The athlete grips the barbell and bends at the knees. The barbell is gripped, palms downward and pulled in a single movement from the platform to the full extent of both arms above the head, while either splitting or bending the legs. During this continuous movement upward the barbell should remain close to the body and may slide along the thighs. No part of the body other than the feet may touch the platform during the execution of the Snatch. The athlete may recover in his / her own time, either from a split or a squat position. The lifted weight must be maintained in the final motionless position, with both arms and legs fully extended and feet on the same line and parallel to the plane of the trunk and the barbell. The athlete waits for the Referees' signal to replace the barbell on the competition platform. The Referees give the signal to lower the barbell as soon as the athlete becomes motionless in all parts of the body.

2.3 THE CLEAN & JERK

2.3.1 The first part, the Clean:

The barbell is centred horizontally on the centre of the competition platform. The athlete takes the start position behind the barbell. The athlete grips the barbell and bends at the knees. The barbell is gripped, palm downward and pulled in a single movement from the platform to the shoulders, while either splitting or bending the legs. During this continuous movement upward the barbell should remain close to the body and the barbell may slide along the thighs. The barbell must not touch the chest before it stops at the final position either on the clavicles, chest or on fully bent arms. The athlete's feet must return to the same line and the legs must be fully extended before starting the Jerk. No part of the body other than the feet may touch the platform during the execution of the Clean. The athlete may recover in his / her own time and must finish with the feet on the same line and parallel to the plane of the trunk and the barbell.

2.3.2 The second part, the Jerk:

The athlete must become motionless with the knees fully extended before starting the Jerk. The athlete bends and dynamically extends the legs and arms simultaneously to move the barbell upward in one motion to the full extent of the arms, while either splitting or bending the legs. The athlete returns his / her feet to the same line parallel to the plane of the trunk and the barbell with his / her arms and legs fully extended. The athlete waits for the Referees' signal to replace the barbell on the competition platform.

The Referees give the signal to lower the barbell as soon as the athlete becomes motionless in all parts of the body.

Before the Jerk, the athlete may adjust the position of the barbell for the following reasons:

- a) to withdraw or “unhook” the thumbs
- b) if breathing is impeded
- c) if the barbell causes pain
- d) to change the width of the grip

The barbell adjustments noted above are not considered to be an additional attempt at the Jerk.

2.4 GENERAL RULES FOR ALL LIFTS

- 2.4.1 The technique known as “hooking” is permitted. It consists of covering the thumb with the other fingers of the same hand at the moment of gripping the barbell.
- 2.4.2 In both lifts, the Referees must count as “No lift” any unfinished attempt in which the barbell has reached the height of the knees.
- 2.4.3 After the Referees’ signal to lower the barbell, the athlete must lower it in front of the body. The grip on the barbell must only be released when it has passed the level of the shoulders.
- 2.4.4 An athlete, who, for any reason, cannot fully extend the elbow(s), must report / display this fact to all on-duty Referees as well as the Jury prior to the start of competition and may remind them of this fact prior to the start of each lift when on the platform. This is the sole responsibility of the athlete. The Jury may call the Competition Doctor to examine it.
- 2.4.5 When snatching or cleaning in the squat style, the athlete may assist their recovery by swinging or rocking their body while in the squat position.
- 2.4.6 The use of chalk (magnesium carbonate) is permitted.
- 2.4.7 The use of grease, oil, water, talcum, cream or any other lubricant on the athlete’s thighs is forbidden. An athlete who uses forbidden lubricant(s) is ordered to remove it immediately. If during the removal, the clock is running for that athlete, the clock remains running.
- 2.4.8 It is the sole responsibility of the athlete to complete each lift in accordance with the IWF TCRR and to the satisfaction of the on-duty Technical Officials.

2.5 INCORRECT MOVEMENTS

2.5.1 Incorrect Movements for All Lifts

- 2.5.1.1 Pulling from the hang, defined as: stopping the upward movement of the barbell during the pull.
- 2.5.1.2 Touching the platform with any part of the body other than the feet.
- 2.5.1.3 Pause during the extension of the arms.
- 2.5.1.4 Finishing with a press-out, defined as: continuing the extension of the arms after the athlete has reached the lowest point of his / her position in the squat or split for both the Snatch and the Jerk.
- 2.5.1.5 Bending and extending the elbows during the recovery.

➤ IWF TECHNICAL AND COMPETITION RULES & REGULATIONS

2.5.1.6 Leaving the competition platform or touching the area outside the competition platform with any part of the body before the complete execution of the lift.

2.5.3.2 Touching the thighs or the knees with the elbows or the upper arms.

2.5.4 Incorrect movements for the Jerk

2.5.4.1 Any apparent effort to jerk which is not completed; including, lowering the body or bending the knees.

2.5.4.2 Any deliberate oscillation of the barbell to gain advantage. The athlete must become motionless before starting the Jerk.

2.6 INCOMPLETE MOVEMENTS AND POSITIONS

2.6.1 Uneven or incomplete extension of the arms at the completion of the lift.

2.6.2 Failing to finish with the feet and the barbell in line and parallel to the plane of the trunk.

3.3.6 Technology and Information System (TIS)

The TIS is a complex and integrated competition management application including the competition management software and the following hardware:

3.3.6.1 Referee Light System (Regulation)

3.3.6.2 The Referee Light System is the means by which Referees adjudicate the lifts.

3.3.6.3 The Referee Light System consists of one (1) control box for each of the three (3) Referees and a control panel for the Jury.

3.3.6.4 Each of the Referees must give the “Down” signal by pressing the white button for a “Good lift” or the red button for “No lift”, according to the relevant rules.

3.3.6.5 When two (2) of the Referees have provided identical decisions, a visual and audible “Down” signal is given to the athlete to replace the barbell on the competition platform.

3.3.6.6 If one (1) Referee presses the white button and another Referee presses the red button and the third Referee does not press either, the latter hears an intermittent audible signal from the control box prompting him / her that a decision is required.

3.3.6.7 The signal is only a reminder to the Referee; the Referees must be certain in their decision of “Good lift” or “No lift”. The signal should not force the Referee to make a decision. When two (2) white lights or two (2) red lights have been given by two (2) of the three (3) Referees and the “Down” signal has been seen and heard, the Referee who has not provided a decision is reminded to give his / her decision by way of the intermittent audible signal.

3.3.6.8 Three (3) seconds after the three (3) Referees have given their decision; the “decision lights” light up, indicating the individual decision of the Referees by corresponding colours, either red or white. The decision lights remain lit for a minimum of three (3) seconds.

3.3.6.9 After the visible and audible “Down” signal and before the decision lights operate, the Referees have a three (3) second window to reverse their decision. If a Referee misses the three (3) second window he / she must raise the small flag provided to them to indicate a change in decision.

3.3.6.10 When the “Down” signal has been given and the “decision lights” are on and the athlete does not lower the barbell, the Centre Referee must say “Down” and signal the athlete to replace the barbell to the competition platform.

3.3.6.11 During the competition, the Jury monitors the work of the Referees through a control panel. Every decision by the Referees may be verified as the lights on the control panel light up instantly when the Referees make a decision. Slow, fast or no decision(s) may be identified for immediate or further action.

Should the Jury want to call any of the Referees to the Jury Table, the Jury President does so by pressing the button on the control panel, which gives an audible signal to the Referee(s) in question.

- 6.5.3 The Technical Officials of the group are introduced after which the Technical Officials submit their TO Cards to the Jury President.

6.6 COURSE OF THE COMPETITION

- 6.6.1 The barbell is loaded in progression. The athlete requesting the lightest weight lifts first. Once the announced weight is loaded on the barbell, and the clock has started, the weight cannot be reduced. The athlete or Team Official must therefore observe the progression of the loading and be ready to make the attempt at the weight they have chosen. This is the sole responsibility of the athlete / Team Official. In case of any mistake occurring in the lifting order, either by fault of the athlete / Team Official / TO / Speaker, the lifting order according to the rule is applied for the classification of athletes.
- 6.6.2 The weight of the barbell must always be a multiple of one (1) kg.

➤ IWF TECHNICAL AND COMPETITION RULES & REGULATIONS

6.6.3 The automatic progression after any successful attempt for the same athlete is one (1) kg. If the lift is unsuccessful the weight on the barbell automatically remains the same.

6.6.4 The minimum weights which must be lifted at IWF Events are:

- Men = twenty-six (26) kg (20 kg bar, collars and two 0.5 kg discs)
- Women = twenty-one (21) kg (15 kg bar, collars and two 0.5 kg discs)

6.6.5 **20 kg Rule** (Regulation)

The total weight of the starting attempts declared and actually taken in the Snatch and the Clean & Jerk must equal or exceed the weight of the verified Entry Total minus twenty (20) kg. The Jury will exclude the athlete from the competition if this rule is not adhered to. The above rule is commonly referred to as the “20 kg Rule”.

6.6.6 **Calling Order** (Regulation)

The following four (4) factors listed in priority must be considered when calling the athletes:

1. The weight of the barbell (lightest weight first)
2. The number of the attempt (lowest number first)
3. The sequence / order of the previous attempt(s) (the athlete who lifted earliest is first)
4. The start number of the athlete (lowest first) – For the allocation of start numbers see Regulation to 6.4 – Weigh-in

6.6.7 One (1) minute (60 seconds) is allocated to each athlete between the calling of his / her name and the beginning of the attempt. After thirty (30) seconds, a warning signal sounds.

When an athlete attempts two (2) lifts in succession, he / she is allowed two (2) minutes (120 seconds) for the succeeding attempt. (For exception see 6.6.8)

Thirty (30) seconds after the start of the allocated time and thirty (30) seconds before the end of the allocated time, a warning signal sounds. If at the end of the allocated time the athlete has not raised the barbell from the competition platform to make the attempt, this attempt is declared “No lift” by the three (3) Referees.

The timing clock is started the moment the Speaker finishes the announcement of the attempt in English or when the barbell is loaded and the Loaders have left the platform, whichever is last. The clock must be stopped if any individual other than the athlete goes onto the platform.

6.6.8 An athlete is granted only one (1) minute if while taking two lifts in succession the calling order changes and the clock starts for another athlete.

6.6.9 The weight announced by the Speaker must be immediately displayed on the Attempt Board.

6.6.10 When an athlete wishes to increase or decrease the weight originally selected, the Team Official / athlete must notify the Chief Marshal by signing the Athlete’s Card. In order to increase the weight the Team Official / athlete must sign the Athlete’s Card before the final call (except TCRR 6.6.12). In order to decrease the weight, the clock must not have started for that athlete.

6.6.11 The final call is the signal given by the timing clock thirty (30) seconds before the end of the allocated time.

6.6.12 Before the first attempt and between two attempts the Team Official / athlete must notify and sign the next attempt on the Athlete's Card; both for declaration and automatic increment. This signature enables two (2) changes.

If the Team Official / athlete fail to do so before the final call (30 seconds), the athlete will be called according to the automatic progression.

When an athlete is taking consecutive attempts (2 minutes allocated time), the Team Official / athlete must declare the next attempt within the first thirty (30) seconds after being called, even if it is the automatic increment.

Failure to do so will forfeit the two (2) changes allowed. The athlete will then have to take the automatic increment. (See TCRR 7.10)

6.6.13 When the Team Official / athlete asks for a change of weight and still has to take the heavier weight next, the clock is stopped while the weight is changed. After the change of weight has been completed, the clock continues to run. When the Team Official / athlete asks for a change of weight and, in doing so, follows another athlete whose time has started, the normal one (1) minute (60 seconds) applies for the next attempt. (See TCRR 7.10)

6.6.14 The Team Official / athlete must sign the Athlete's Card if they wish to withdraw from the Snatch or the Clean & Jerk portions of the competition, or both. It must be noted and signed on the Athlete's Card that they are withdrawing from the respective lift(s).

Once the Athlete's Card has been signed the withdrawal is official and the athlete cannot re-enter the competition in that respective lift. The Speaker then announces the withdrawal.

6.6.15 During competition only on-duty Technical Officials, authorised personnel, authorised Team Officials (See TCRR 6.4) and athletes of the specific group are allowed in the FOP.

6.6.16 Only three (3) Team Officials are permitted to stand at the designated area / entrance of the competition platform / stage.

- 8 When a Referee Light System is used, up to three (3) Referees (Centre and two (2) Side Referees) may be examined simultaneously, otherwise, if a Referee Light System is not available or functioning, due to technical difficulties, only the Centre Referee may be examined.
- 9 The Examination Panel record their marks using the Protocol sheet as a score sheet.
- 10 The name of the candidate(s) and their Member Federation are entered to correspond with their position at the competition platform / stage, (i.e. the Referee at the left is number 1, the Centre Referee is number 2 and the Referee on the right is number 3). The Examination Panel sign their name, date and indicate their Member Federation.

- 11 Candidates must referee at least one hundred (100) attempts, including both completed and uncompleted attempts.
- 12 The Examiners first mark at the top of each space on the protocol is their own opinion of each lift.
- A / indicates a "Good lift" and an X indicates "No lift". Underneath the mark, and using the same signs, Examiners mark the decisions given by the three (3) Referees.
- Example: / = white light X = red light
- /
/// = all three have given a correct decision
- X
XXX = all three have given a correct decision
- X
X / X = the Centre Referee has given an incorrect decision
- X
/ X X = Referee Number 1 has given an incorrect decision
- 13 When only the Centre Referee is examined and he / she gives an incorrect signal (e.g. a signal too fast or too slow) the Examiners mark this with an X, plus the letter S below to indicate the incorrect signal. The candidate can thereby commit two (2) faults during one (1) attempt. Both these faults are shown on the protocol.
- 14 The Examiners mark with an O every attempt which is not completed by the athletes.
- 15 If a candidate gives an incorrect decision during an uncompleted lift, the examiners mark with an X instead of an O and give the number of the error.
- 16 The results of each candidate are calculated from the completed attempts.
- 17 The original protocol and written exams are sent to the IWF Secretariat to register the candidates' examination results.
- 18 The IWF Secretariat transmits the results to each candidate through the candidate's Member Federation. The successful candidate(s) also receive their card and licence via their Member Federation.
- 19 For TOs who already hold a valid Category 2 licence for the given Olympiad are promoted to Category 1, the Category 1 TO licence must be purchased for 200 USD, in order to receive the new Category 1 card.
- Any requests for Technical Official promotions processed in the last year of any given Olympiad, a pro rata license fee of 50 USD is applied.
- 20 Candidates who fail either practical or written must wait at least six (6) months before taking the examinations again.

3 TECHNICAL OFFICIALS AT WORLD CHAMPIONSHIPS AND OLYMPIC GAMES

3.1 PRINCIPLES FOR TECHNICAL OFFICIALS' SELECTION:

The following are the IWF principles for selection of Technical Officials to IWF Events:

1. Gender equity; using the IOC principles as a guideline
2. Continental representation/balance
3. Participating Member Federation competing at the Event
4. Conditions prior to being nominated:
 - adequate qualification
 - valid licence
 - official TO uniform
 - availability for the duration of the Event
 - responsibilities / skill set

- 3.2 When requested by the IWF, Member Federations may propose Technical Officials to officiate at the World Championships. The IWF Technical Committee/Medical Committee selects from the proposed list of TOs, in consultation with the IWF President and Technical Committee Chairperson for the final appointment.

The number of TOs to be selected is determined by the IWF with the knowledge of the exact program of the Championships. Member Federations who submit TO nominations are advised of the appointment or non-appointment of their Technical Officials.

If required and at its absolute discretion, the IWF reserves the right to appoint Technical Officials outside of those nominated from any Member Federation. The above appointed Technical Officials and their respective Member Federations will be duly advised.

- 3.3 The IWF Technical Committee Chairperson, in conjunction with the Competition Director assigns the selected/appointed TOs to the specific categories or groups before the start of the competition.

- 3.4 For the Olympic Games, Technical Officials are selected six (6) months before the start of the Games by the IWF Executive Board, from the list of the candidates submitted by the Member Federations and upon recommendation from the IWF Technical Committee.

If required and at its absolute discretion, the IWF reserves the right to appoint Technical Officials outside of those nominated from any Member Federation. The appointed Technical Officials and their respective Member Federations will be duly advised.

- 3.5 Appointed Technical Officials may not be members of their National (Olympic) team.
- 3.6 Jury members and Referees from the same Member Federation/NOC cannot be selected to adjudicate in the same group.
- 3.7 Appointed Technical Officials who fail to show up, without valid reason and notification to the IWF Secretariat and Technical Committee Chairperson, for the Event may be excluded from selection to further Events for a period of up to two (2) years.

Reference to the IWF TCRR section 7.4

At a minimum, thirty-five International Technical Officials (ITOs) must be selected for major Events; or more, depending on the number of competitors and groups contested. The optimal number for selection and proficient delivery of competition is forty-five ITOs for World Championships.

In addition, a suitable number of National Technical Officials (NTOs) must be selected by the Organising Committee/host Member Federation to serve within the auxiliary technical roles of the competition.

Technical Official group allocations/assignments are made by the Competition Director, in cooperation with the IWF Technical Committee Chairperson, prior to the Technical Officials meeting.

The objective of the IWF is to achieve 50% female representation within each group of Technical Officials selected and appointed.

Upon being advised of their appointment, selected TOs must confirm their acceptance and participation. TOs must attend the Event from the start to the end of competition, including both Technical Officials Meetings, prior to and mid competition.

4 JURY

- 4.1 The Jury has the ultimate control on the FOP and its primary function is to ensure that the TCRR are being correctly followed and applied.
- 4.2 All Jury members must be Category 1 Technical Officials.

- 4.3 At IWF Events, the Jury is composed of three (3) or five (5) members each, one of which is the President. Up to two (2) reserve Jury members may also be appointed.
- 4.4 Throughout the course of the competition / Event, after observing the work of the TOs, the Jury members may highlight any special occurrences by way of written report. The President of the Jury may deliver the reports to the Technical Committee Chairperson, IWF President and/or IWF General Secretary.
- 4.5 Throughout the course of the competition and after a first warning, the Jury, by unanimous vote, may replace any Technical Official whose decisions prove him/her to be incompetent.
- 4.6 The impartiality of all Technical Officials is not to be doubted. Errors in officiating may occur involuntarily and in such situations, the TO is allowed to explain his/her decision to the Jury, if desired or requested.
- 4.7 The Jury has the power to reverse a decision when the Referees' decision has been judged unanimously by the Jury to be technically incorrect. In order to consider the reversal of a decision, the Jury must call the Referees in question to seek an explanation. If the explanation is accepted, no action is taken, if the explanation is not accepted the Jury will reverse the decision. Such decision and its reason must be communicated to the athlete / Team Official concerned via the Technical Controller or any other TO, as directed by the President of the Jury, and announced by the Speaker.

When the decision of the majority of the Jury members differs from that of the Referees' decisions, the Jury may call the Referees in question to seek an explanation. If the explanation is accepted, no action is taken, if the explanation is not accepted and the Jury reaches unanimity, the Referees' decision will be reversed.

In Events where the composition of a three (3) member Jury is appointed, unless unanimity is reached in the first instance, the Jury cannot take any action

- 4.8 In order to apply the above rule, the Jury members have to give their decision on each lift using the Jury Control Unit located on the Jury table. Jury members adjudicate the lift once the athlete has replaced the barbell on the competition platform. (See TCRR 3.3.6).
Jury members must not influence or attempt to influence the decision of the other Jury members.
- 4.9 The Jury is not a Jury of appeal; there is no appeal against the Jury's decision. The Jury has the power to reprimand and/or sanction an athlete / Team Official for displaying misconduct within the FOP. In particular, if the misconduct, either by actions or words, represents a threat to any Technical Official or IWF personnel during the performance of their duties. The President of the Jury, in conjunction with the IWF President, IWF General Secretary or IWF Competition Director will be responsible for executing any reprimand and/or sanction.
- 4.10 Throughout the course of the competition, the Jury must monitor and enforce TCRR 6.6.5.

- 4.11 Reserve Jury members sit at a designated space on the FOP and do not sit at the Jury table unless called upon to replace one of the other Jury members.
- 4.12 Jury members must remain in their respective place for the Victory Ceremony and also ensure that the Referees remain in their respective positions.
- 4.13 The Jury President is required to assess the need to recall “B” Group or any other Groups’ athletes to attend “A” Group competition should the “B” Group athletes be deemed to be medal prospects.
- 4.14 If a lift is failed because the barbell is not equally loaded, or the platform is damaged or the barbell becomes disarranged during the lift; or there is an incursion or any other external interference, the Jury must grant an additional attempt for the affected athlete.
- 4.15 If there has been an error in loading the barbell or if the Speaker makes a serious error during the announcement of an athlete’s name or the calling of the weight the Jury must grant another attempt. (See Regulation to 7.5).
- 4.16 The President of the Jury controls and signs all Technical Officials’ Cards.
- 4.17 At all IWF Events, the President of the Jury shall appoint an individual to complete a manual Protocol as a back-up document.
- 4.18 The President of the Jury verifies and signs the final competition Protocol.

If the barbell is loaded to a lighter weight than the one requested by the athlete, the athlete may, if he/she wishes, either accept the attempt if it was successful and provided the barbell was loaded to a multiple of 1 kg, or refuse it. If he/she refuses the attempt, the athlete is granted an additional attempt with the weight originally requested.
2. If the barbell is loaded to a weight which is not a multiple of 1 kg and the lift is successful, the athlete may accept the attempt at the next lower weight which is a multiple of 1 kg, or refuse it. If the athlete refuses the attempt, he/she is granted an additional attempt with the weight originally requested.
